Preface

Eupheus Learning presents **WOW! World within Worlds**, an outstanding series of general knowledge textbooks for classes 1 to 8 following an approach to teaching and learning that is truly unique and differentiated.

The aim is to move away from the traditional method of rote learning to exploratory learning approach that encourages the learner to think out of the box and realize that subjects, which are otherwise taught in silos, have an underlying commonality. It demonstrates a cross curricula approach of-worlds within a world.

Each topic is linked to various subjects like literature, mathematics, history, geography, life skills, value education, art & culture etc. moving from global to India specific content. The level of content is related to the curricula taught in the class. Innovative strategies have been employed to make learning fun and engaging.

The **WOW! World within Worlds** series moves away from just transmitting knowledge to facilitating students' autonomous learning and self-expression. It stresses upon self-directed, integrated learning where the approach is flexible and the students are active participants in the learning process.

The series comprises textbooks, which include projects and test papers, and current affairs (global and local that are periodically updated).

Given below are some important features of the series:

- Content is related to class curriculum with level appropriate language
- Each chapter is linked to multiple subjects
- Infographics are presented for understanding content often discussed but not explained
- At a glance provides a bird's-eye view on the subjects covered in each chapter
- Unusual and interesting bits of information given in Did You Know? add new dimensions to the topics
- Exercises in Train your Brain help in sharpening the students' numerical and linguistic abilities
- Just for Fun has humorous anecdotes or riddles
- Infochutes are current affairs of what is happening and updated periodically
- Do-it-yourself activities for classes 1 to 4 that are fun, engaging, and creative
- Guided projects for classes 5 to 8 to encourage and inculcate researching capabilities
- Test papers at the end of each book to help reinforce learning
- The teacher resource pack contains answer keys and additional questions

We hope you find this integrated, one of a kind series engaging, fun, and a whole new experience in learning.

Eupheus Learning

Pedagogical guidelines of the National Education Policy (NEP) 2020 highlighted along the content to make teachers cognizant of the specific learning skills

 CR Creativity	 VI Value Integration	 ART Art Integration
 CT Critical Thinking	 IC India and Culture	 EA Experience and Apply
